To Whom It May Concern:

We urge you not to change the labeling regulations that would allow manufacturers to use the "Made in the USA" label for products that are essentially created or built elsewhere in the world, then shipped here to be finished and packaged for sale in America. We want you to keep the present regulation of merchandise being at least 98% of costs originating in our U.S. We, as customers, and U.S. citizens think we are deserving to know that a U.S label means what it says.

Thank you.

Mr. + Mrs. B.E. Lintelman
