To Whom It May Concern:

Please maintain the definition of "Made in the U.S.A." as it now stands. As a consumer I choose products with this label knowing that I am supporting production in this country and workers who are being paid a decent wage. Diluting this label is unfair to U.S. workers and consumers!

I want to know if what I am buying is produced entirely in the U.S. or only partially. To group the two categories together is dishonest. Please do not follow through with this proposal!

Sincerely,

ANN RAPOSE
