SECRETARY

Federal Trade Commission

Allow me to introduce myself, My name is Nathan Macny of Pemsylvania. I'm a hard Worken American and when everything went down the tobes I was affected, I lost my 401K match and hourly wage so It was really difficult for me to make my Bills and other payments. I was so strapped until I heard of Dept Regret they have tremendously helped me out and still are. Debt Regret has helped me and kept me out of just filing bankrupcy. I couldn't have asked the government to help because They would have just laughed at me. Instead They can help Wall street and Car company's the government can use my money to bail them out because they are so big and can't regulate their money They just want more. So the rich keep getting richer and our own government says thats ok we will still help you. But me The tax payer gets nothing just more taxes to pay. So my request for not just me but for the American people is that The FTC does not regulate Debt Settlement Companys out of buisness as the Company's provide a benefit to consumers and American People in need. Dept Regret has kept me out of bankrupcy and many more Amerians out of bankrupcy. So please stop taking good benefits away from good American people.

Thank You Sincerly,

//
