Comments on Project P954501 + Question 14

Re: Guide for use of environmental marketing claims; Project No P954501; Question 14

I'm concerned with cosmetics + toiletries that are labeled "organic" but don't have the USDA label on them. This should be illegal.

Please make companies address the fact that simply having organic agricultural products in the ingredients, while still containing chemicals made in a labatatory does <u>not</u> qualify to label a product "organic."

Thank you + Happy Holidays,

Mr. Ravi Grover
