FEDERAL TRADE COMMISSION
RECEIVED DOCUMENTS
JUN 16 2006
SECRETARY

June 12, 2006

Dear Sir or Madam,

I would like to address the hardships the "Business Opportunity Rule Bill R511993" would put on small business people and new comers to small Multi Level business.

If this proposal is past it will undermine the livelihood of people that are trying to better themselves like the average housewife, single parents, even college students etc. The paper work would be over whelming.

I have been doing business with two very reputable companies "Nouvir USA Inc." and "Nature's Sunshine" since 1982. They both have been very honest and straight forward. They stand behind their contracts and products 100%.

I have to do this business to pay our health insurance, as do many other people in the low or lower income bracket. It seems our government doesn't want small business anymore. This proposal would confront people with such a mountain of paper work, that it would turn people off from even trying to go into business for fear they would do something wrong and end up in Court.

Please reconsider this proposal and look at the livelihoods of the people this will effect.

I am aware that we need the FTC to protect consumers, but I believe this is over protection. I hope you will reconsider this proposal on behalf of the thousands of small businesses it will effect.

Thank you for taking the time to read my comments!

Sincerely,

Phone [redacted]
