Internet Service Plans & Prices from AT&T

AT&T is one of the most well-known Internet service providers around the world. In addition to the outstanding phone service AT&T offers, they also provide a variety of Internet preferences and options to choose from in the plans you can choose from.

Current AT&T Internet plans can reach up to 1000 Mpbs with the AT&T Fiber plan (formerly U-verse). No need to worry about data usage either, Fiber comes with an unlimited data plan included. If Fiber isn't available in your area, AT&T Internet can still reach speeds of 100 Mpbs depending on your area. The prices of these plans range depending on availability, and can be bundled with TV and phone service for extra savings.

AT&T has Internet plans that work for the casual browser all the way up to the hardcore gamer or TV streamer. No matter what speed you need, they have a plan for you. The breakdown below covers the plans they provide, so you can select the perfect one for you. If you have any questions or have a plan selected, just give us a call and we can get you set up!

Actual customer speeds may vary & are not guaranteed. Which Plan Is Right For You?

If you're a residential customer looking an internet connection, you might wonder which speed is right for you and what it all means anyway. Internet speed is measured in megabits per second or Mbps. The more megabits you have, the more you'll enjoy seamless streaming to your TV, and the more time you'll save with faster upload and download speeds. Depending on your data needs, you may not need the top level of high-speed internet service. If you're having trouble deciding, give us a call and we can help go over the different speeds.
