

CHAIRMAN FTC/ SPAM FORUM

SIR, I AM VOICING MY VIEWS

It is high time for those that are drinking from the internet well, such as every company taking revenue from this technology to contribute to solving the Spam problem.

Email is now a total sewer. Spam is of their making and they need to police it or solve it or come up with the funding to fix it. And if not then legislation and taxes should be in order. Its nice TO LEARN that aol, Microsoft & yahoo suddenly woke up to their responsibility in considering their customers and profit base.

You mat quote me.

C. Josh Abend, Pres. INNOVATION CITY

PS: If you need any assistance for directing the process for reaching creative solutions in this area as experts in innovation we would be glad to assist.
