Dear Secretary Clark:

I believe that your "Made in America" determination needs to reflect the actual labor needed to produce that product. The labor and materials used to produce a product reflects the true origin of those goods produced.

This seems to be another "Kick the American Worker in the Teeth" attitude, that is rampant in this country today.

I am very disturbed by your new proposal because it has always meant a lot to me to purchase products Made in the USA by American Workers. I always check labels when purchasing anything from clothing to appliances.

Very truly yours,
