Pedia Loss is safe and effective for children of all ages

This synergistic formula was designed to aide in a child's glucose metabolism. Since many of their favorite foods are rich in carbohydrates but very low in dietary fiber, their digestive tracts and insulin never function properly. Now with Pedia Loss children can still enjoy their favorite food but with the help of Inulin their bodies with slow down the absorption of carbohydrate, allowing more to be burned for energy and less to be stored as fat, and give a great source of soluble fiber. In addition to this highly advanced ingredient, we have included supplemental amounts of both glutamine and FOS, which have both been proven to drastically improve intestinal health. Finally this product contains a highly effective compound called HCA. This compound has been shown to safely burn fat without any form of stimulants.

Inulin is a polysaccharide derived from the Jerusalem artichoke and Dahlia tuber. It is formed by linking 30 fructose monomer units together in a long chain. A natural fiber, it helps to moderate blood sugar levels in the body. Not only can inulin analog help avoid "sugar rushes and crashes" commonly experienced, but it may also help reduce sugar craving, a frequent source of calories. Inulin analog is not absorbed by the digestive tract and therefore contributes no extra calories while improving energy levels.
