Dear Sir or Madam,

I am writing you this letter because I am concerned about your proposed **Business Opportunity Rule R511993**. If this adopted in its present form it will severely damage my business. I have been in multilevel marketing since 1994 and it is my 95% of my income.

The 7 day rule is just ridiculous. I know of only one other thing that you would do that long for before purchasing and that is a gun. Multilevel marketing is just as dangerous. It gives people the impression that there is something wrong. It is just an attempt at interfering with my free enterprise and the health industry and it scares me to think that you would even consider something like this.

The companies that I am a member of comply with all the requirements of buying back product and makes it easy to exit the company at any time if someone decides that they don't feel that it is right for them. They are not forced to buy large packages of products that you don't want or maybe need.

To put all MLM companies in the bracket is unfair. The companies that need to be changed are the ones that make you buy huge quantities of product and make you buy every month whether you need product or not. The best way to remedy that is stop that kind of behavior. I personally have been in some of these companies but have always quit. You should be able to buy what you need, when you need it for yourself or your clients.

As for all the documentation most people will not read all the information. And it will scare those who do. The paperwork would be tremendous for the companies and for all of us independent agents.

This is a big disservice to the American public that would like to start their own business.

Thank you for your time in considering my comments.

Sincerely yours,

  
Shelley Royce
