

I am writing in support of the new Contacts Law. I travel frequently for business and need to carry a prescription with me in the event I need contacts while I am traveling. I have also found that many eye doctors charge a premium for their contacts, and I want the right to purchase a quality product at the lowest price. I have personally experienced a lot of resistance from Dr's when I ask for my prescription. It is not until I threaten to not come back to them in the future that they comply with my request.

Please pass this law so that consumers have a choice.
