

I have worn contacts for 30 years, and have had a few battles with the eye doctors who don't want to give me my prescription. One would not write it down and said it was on the bottle for my contact, I think he thought I would not be able to get contacts that way except through him. Well I did get them but it was a struggle. When I pay for this service, I should be allowed to get my prescription. Please either make this a law or continue this law.

Thank you

Sharon H. Autey
