I oppose having to wait days to receive my contacts after receiving a prescription from my doctor. I do not feel that I should have to go to my doctor to receive the contacts and if I did then I would get them while at the office. I have a right to shop around for contacts just as any other product and when I want to purchase them I should be able to do so without having to wait. Thank you for listening to my concerns.

Sincerely,

Susan Swearingen
