It is important that everyone receive a copy of the prescription for their contact lenses so that they are free to buy them where ever they can get the best price.

I support this rule and the easy access and convenience it gives me. It increases access to contacts. It reduces traffic congestion since I do not have to drive to pick them up. It lowers cost and reduces air pollution by less driving. It gives access to those who do not have a car and those who are disabled and cannot drive.

Michael Doherty.
