Subject: Contact lens purchases

I've been informed by 800-contacts that there is pending legislation that might restrict the means by which I can fulfill my eyewear prescription. If, in fact, this proposal may prevent my ordering contact lenses and/or eyeglasses from any retailer I choose, please register my opposition. While I understand the need for prescriptions to be carefully administered and fitted, once those determinations are made, I enjoy having the flexibility to make my purchase from any qualified supplier. I trust that regulations ensure my retailer is authorized and qualified, but the competition and variety that an open market allows is something I appreciate.

Thanks very much.
