Subject: contact lenses

Dear FTC,

I think that it is extremely important that contact lens wearers retain the right to have a copy of their prescription, as glasses wearers have had this right for years. We should be able to choose our supplier of these lenses, and not be forced to buy them at a premium from a doctors affiliated vision center. Buying lesnes in this manner almost always increases the cost, sometimes as much as 25-50%! Over the lifetime of a contact wearer, this amounts to a substantial amount of money. Please do not change ruling.

Beth Miller
