Subject: Contact Lenses

Dear Sir or Madam,

I am writing to inform you that I, as a contact wearer, wish to have the same freedoms eyeglass wearers have obtaining their prescriptions. I have been charged and received a refund from my eye doctor after finding out he couldn't charge me for the prescriptions.

The problem we are having now is nobody wants to do anything. I, as a consumer, have to run around and make sure people are doing the job they are supposed to do for me. I, as a consumer shouldnt have to be doing that. I shouldnt have to tell the doctor that he can't charge me for the prescriptiopns. He should have enough sense to know it and not even try to charge me. I shouldnt have to make sure insurance claims are filed properly, they should be filed properly in the first place. Isnt that why I pay insurance?

I wanted to let you know that I am against having the eye doctors (or any doctor) charge me for prescriptions.

Greg Hare
