Subject: Fairness to Contact Lens Consumers Act of 2003

To Whom it may concern:

I am a contact wearer and I wholeheartedly support the bill that was passed to allow me to obtain my prescription and fill my contact order without any obligation to my eye doctor. I paid for the eye exam - I should have the right to obtain record of the result. As a consumer, I would like to retain my right to shop around for the most economical price for contacts - They are a recurring and expensive item in my budget. Why would they be treated any differently than eyeglasses?

Please do not let the effort of these special interest lobbyists get in the way of my rights as a contact lens consumer.
