I believe that it is every contact lens wearers rights to be able to purchase their contacts from wherever they choose. It would be totally unfair to limit this right. I have worn contacts for many years, and for the last 7 years have purchased mine online. I never have any problem getting the prescription from my doctor. I hope that I will be able to continue doing this, because anything else would be taking away my freedom to choose where and how much I want to spend on my contacts. Thank you for your time.
