Dear Commission,

It should be easy and as convenient as possible to purchase lenses from whomever I personally choose. It should not be limited to the eye doctor who examined my eyes. That would be like going to an M.D. for a sore throat, for example, and then being required to purchase the prescription only in their office—it would be incredibly inconvenient. It is important first and foremost that a copy of my prescription is available for me to fill as I choose, for the greatest health of my eyes.

Thank you for your consideration!
Jenni Charrier
