Subject: Fairnes to Contact Lens Consumers Act

I am a contact lens wearer and I believe once you pay a doctor for examining your eyes to get the accurate prescription for your contact lenses, you are entitled to this information just as you are entitled to results of medical test. You should have the right to choose who provides you with contact lenses at the best quality and price. I support the Fairness to Contact Lens Consumers Act of 2003. This will prohibit one of the abuses that consumers go through as a result of unfair practices.

Thank you.
