Subject: Fairness to Contact Lens Consumers Act of 2003

Dear FTC,

this is not just about contact lens perscriptions but having any information I requestion about my person that is not freely given in any health mater, financial mater, government matter under the freedom of information and my rights as a US citizen.

This is about "competition and the right to know" I have paid the doctor for his services of given me an eye exam, nothing more, any information about that exam should willingly and freely be given to me.

That is the whole story and end of the story.

do not allow them to ditcate away my rights under the law.

sincerely,

Steven Bowman Reid
