Subject: Rights for contact lens wearers

To whom it may concern,

I strongly urge the FTC to extend contact lens wearers the same rights as those who wear eyeglasses; namely, the right to their prescriptions.

From my own personal experience, I get my contact lenses faster by ordering them on line than going through my optometrist. This is a great convenience to me and many other lens wearers. The same doctor gave me the prescription for my eyeglasses but not for the contact lenses. This does not make a bit of sense.

Your consideration in accepting Project No. 411002 is greatly appreciated.
