Subject: my rights!

I visit my doctor to tell me what what drugs I should take for my condition. I do not purchase those drugs from the doctor! That would be unethical! What's to prevent a doctor from prescribing unneeded drugs knowing that he/she benefits from my purchases? The same should be true for eye doctors. I should be able to take my prescription wherever I choose to do business. I find it unconscienceable that any legislature would be swayed by an interest group that wants to profit at my expense.
