Subject: purchase of contact lens'

I wholeheartedly support the rights of contact lens wearers to copy their prescription and purchase contact lenses at the vendor of their choice.

Aside from the fact that one should be able to get all their medical information and shop where they choose, it is a matter of utmost convenience for people such as me--a busy mother of 3 who loves the ability to simply e-mail my lens provider and know that I will be getting exactly what I want, exactly when I want it at the most affordable price (my optometrist charges significantly more than 1-800-contacts, or Lensexpress. I have no lines to wait in and no other hurdles to jump through.

Please do not change the rules.

Thank you.
