Subject: Don't Delay ability to get contacts quickly

Sirs,

I understand it is under consideration to create a rule to delay the time between when I have been to my eye doctor and gotten a prescription for my contacts lens and when I can order and obtain those contact from my provider. This is terrible. There already is a rule which requires me to get a check up ever so often in order to continue to order my contacts. I suppose this is for my protection to ensure I don't abuse the manner in which I wear the lenses over a given time which could be harmful. However, because of this when I finally get to the doctor to get my new checkup I am almost always in desperate need of new contacts. After I get my prescription from him I immediately call my provider and get new lenses the next day. Please for whatever reason do not create some other reason to delay me getting my lenses---I CAN'T SEE WELL ENOUGH TO DRIVE WITHOUT THEM - I DO NOT BUY GLASSES SO I HAVE NO ALTERNATIVE

Thanks
Tim Kraus
