Subject: Support new contact law

I have worn contacts for the last 15 years and I support the new law to allow all patients to have their contact prescription. I had this problem when I first started wearing contacts and after getting angry and threatening to go elsewhere, which I did, I was able to get my prescription and can choose where I purchase them. I get a good price at 1800contact and I will continue to deal with them unless their prices change and then I want to be able to go elsewhere if need be but I want to be able to have my prescription in order to shop wisely. jwelch746
