**Subject:** Laws for Buying Contact Lenses

I am writing today to let you know my opinion about your proposal to make consumers wait days before their contact lenses can be shipped to them. I strongly disagree with this proposal and would encourage you to let consumers purchase contacts from whomever they choose and let them be shipped to them immediately (without any delay). The person has already had their eyes checked and has been told what their prescription is so why should there be any delay? Please keep the best interests of the consumer's in mind when you make your laws and don't put a waiting period on ordering contacts.

Thank you,  
Jeremy Bennett
