Subject: Waiting period for contact lenses

To Whom This May concern:

I wear contact lenses everyday. I support the right of consumers to order their contacts quickly from vendors outside the doctor's office. Many times I have needed new contacts and could not wait days or weeks for them to be approved and shipped to me. It would be unfair to have a waiting period when the contacts are needed immediately. With a proper prescription, there is no reason to create a waiting period.

Thank You,
Lorraine Young
