Subject: the law to have Drs. release contact lens Rx's

I very much support the law that requires that doctors release contact lens prescriptions to their patients. I have been fortunate enough to have an eye dr. that has always released mine to me, and have gone to less expensive, more convenient places to purchase my lenses. However, I have friends and family members that have had a more difficult time. I feel that this should be no different than getting an eye glass Rx, or for that matter, ANY Rx. The conflict of interest represented by a doctor requiring that you fill the Rx through them seems obvious - and completely unethical.

Sincerely,
Jill A. Kocherhans
