Subject: laws for prescription contact lenses

To whom it may concern,
this email is to voice my opinion on a current
upcoming law regarding the purchase of contact lenses.
I do not know the details of the proposed law. What I
do know is this:

1. In the past consumers have been forced to purchase contact lenses only from the physician that gave them the eye exam. This resulted in being overcharged, paying sometimes double the amount the product would cost from another vendor.
2. Consumers have a right to purchase contacts from other sources besides from the physician who gives them the eye exam for fair competition.
3. Consumers have a right to purchase the products IN A TIMELY MANNER, NOT HAVING TO WAIT DAYS FOR THEIR PURCHASE. This would be totally unfair and ridiculous.

Thank you.
