Subject: keep the CEA out of my bussiness

Contact Enforcement Agency!!! We will take over where the DEA falls short. They are contacts for gods sake! don't we have bigger problems to worry about than contact lenses.

With that said; In the communist country to our north from where I came I was never able to purchase contact lenses on my own. I was forced to pay extortion prices from the doctor because my prescription, if I did get my hands on it, required a decoder to figure out.

Please don't put our wallets and convenience in the hands of the doctors in America too. They should not have to focus;-) on business and service but should be left to do what they are trained to do. Otherwise I may be forced to buy my contacts online from China like everything else.

Thanks for reading.
