Subject: Prescriptions

I think it would be unfair to make contact lens wearers pay for their prescriptions or have to buy lenses from their eye doctor.

Let me give you a for instance: my eye doctor charges me \$20 per pair of my lenses. I can get 3 pair of lenses for that from 1-800-contacts.

Personally I think the federal gov't should allow consumers to make their own decisions just like they do for eyeglass wearers.
