Subject: support for Fairness to Contact Lens Consumers Act of 2003

I heard recently that you passed this Act recently, and for that I have to say a giant "Thank You." In the past I've been gouged following my contact lens fitting by one doctor in particular after he told me that I was required to get my prescription filled by him. Of course he preferred it that way because he was getting a huge cut of that. He refused to give me the prescription so I had to switch doctors in the end, but only after paying (me and my insurance) probably \$100 more than we should have. I know that I'm a bit less willing to put up with ridiculous situations like that than most consumers are, so I'm glad to hear that this Act is in place to keep others from having to just bite the bullet.
