I believe that I have the right to purchase contact lens from the dealer i choose not to be forced into buying lenses frommy doctor. My eye exam results are my personal medical information and no doctor should have the right to withhold that fromme or charge me for it. The doctor got his money when he received paymentfor the eye exam.

PLease let us keep to right to choose at no extra cost. Optical insurance isn't much to write home about as it is and so much of this comes out of my own pocket, i should be able to choose where it goes from there.
