Subject: don't change the current law

As a contact lens wearer, I have the right to purchase my lenses from any source that I chose (personally I use 800-contacts) and I don't understand why there is new proposed legislation to limit where a person can purchase lenses and/or how long they must wait before receiving their lenses.

Stop meddling with such matters and get on with more important things, you know, like the economy! Perhaps consumers wouldn't HAVE to seek out cheaper alternatives to the doctors filling their contact prescription if we all weren't so strapped financially.

This right-wing administration must go!!
