Contact Lens Rule, Project No. 411002,

To whom it may concern,

Regarding these controls you are trying to impose I strongly disagree with the limitations or delays to fill a contact lens prescription.

It is our right to have free and fast access to our prescriptions, that we might urgently need.

The vendor just need to know you have an actual prescription or professional eye care.

As long as you know your prescription and you eye health, everyone must be free to buy contact lenses.

Please don't put more harassment on us, the people.

Thanks.
