As a long time contact lens user - and an active voter - I strongly urge you to let consumers continue to order our contact lenses from companies like 1- 800 Contacts with no delays. I cannot recall how many times I have torn or lost a lens and needed another one fedexed to me the next day. When I am on the road they even find me at my hotel to deliver the lens.

I have no idea why I should be made to wait several days for my contacts if I want to order them via the Internet or by phone form a lower priced, faster service than my eye doctor can provide.

Please don't take away my rights as a convenience-seeking contact lens wearer!

thanks.
