Subject: Contact Lens

I am writing because I have been informed that a law has been passed which will require a delay in the shipment of a contact lenses order - It should be realized that in many cases lenses are necessary in order for daily functions to be done and that without these people would loose valuable time.

This is indeed an invasion of the government where it is not necessary and truly is "big brother" in an area where they do not belong.

I would hope that someone would review this situation, if it be true, and use common sense -

Sincerely,

Belle Finfer
