Subject: contact lenses

I can not afford to wait days for my contact lens' delivery. I usually get them as quickly as possible after ordering with 1800contacts because I don't have glasses. I don't have the option of wearing glasses for a few days while waiting for my contact lenses to arrive. I need the lenses ASAP or I will not be able to see properly. That means no driving, no work, no physical training at the gym. There are a lot of things that would be hampered if I could not receive my contact lenses in a timely manner. I do not wish to see any law which would slow down their delivery go into affect.

Best,

Patrick Cameron
