Thank you for reading this E-Mail. I wholeheartedly support the Fairness to Contact Lens Consumer Act of 2003 without any further adjustments, restrictions or "tweaking" to limit what Congress gave to us contact lens users. I was surprised at my first eye exam after moving here when I was told that New Mexico State Law forbade eye care professionals from giving me my contact prescription! Explanation - "It would be dangerous." Since I had just come from a state where I had no trouble getting the prescription and have friends who live in states where the same is true, I argued. Reluctantly, he gave it to me. Dangerous? To whom - the wallets of eye care people who do not want to compete with the large providers like Lens Express and lower prices. That silly law has since been repealed in N M - at consumer behest!. Guess what - the local prices for contacts came down. Good ol'e competition. Keep up the good work - don't let them water down the new federal law.

John Nolin -
