Subject: Contact Lens Consumers Act of 2003

I was very happy when Congress passed the above law. It is very important to me that I have a choice on where I buy my contacts and glasses. For years eye doctors have held the consumer hostage by not giving us our prescriptions and forcing us to buy contacts only from them. The new law forbids this practice.

I was very dismayed when I heard that the eye doctors were lobbying your agency to weaken the above law. Shame on them and their self serving ways! Consumers demand and need choice. Hopefully you will agree with me and strongly enforce the above law! Thank you!!
