**Subject:** Fairness to Contact Lens Consumers Act.

I support the above named act that provides when a contact lens fitting is done, my eye doctor must give me a copy of my prescription - whether i ask for it or not. I oppose that part of the proposed rule which could make me wait days for my lenses ! It is important to me to have the freedom to obtain lenses quickly and easily. Having to wait days for lenses could be a problem especially if circumstances require next day service.  
For example i recently ran out of lenses, due to a damaged left lens. I was leaving to go out of the country and the online lens provided was able to immediately overnight them!
