Subject: MY EYES

Why does the FTC or anyone else for that matter need to get in our personal business which includes my contact lens? I should be able to purchase my contacts from whomever I choose and get them when I need them, not when "big brother" thinks I should have them. I think this is going a bit too far. Absolutely the doctor doing the exam should provide me with my prescription, after all, it is my prescription right?, and I did pay for that service, right?? What is wrong with our society that now someone thinks they should babysit contact lens wearers? Don't tell me they have nothing better to worry about? Will it come to "black market" lens purchasing? Please leave us this trivial part of our lives and find a constructive cause to invest our government money and stop wasting valuable time and resources. I can't even believe that we have to defend this right or waste the time sending this email so that we can get our ! ;lens' when we need them. Shame on whomever is proposing this stupidity.

Disgusted,
Responsible Contact Lens Wearer
