Subject: New Contact Lens Laws

Dear Sirs,

You may not wear contact lens, but I do. After years of suffering through foggy glasses, ear burns, and oily build-up on the bridge of my nose, I made the switch to contacts.

Initially, it was not easy to find a supplier who could provide quick access to the types of lens which were suitable for the curvature of my eyes, hence, long wait times, and aggravating periods of back-up glass wear times. Now, I have found an alternative mail-order service which delivers right to my door in an efficient and expedient method. Don't take this away from me. I can't afford to be without my contact lens. They are no essential to the job, since I spend an inordinate amount of time in from of the computer. Glasses are not functional for me. I must have access to a company that can ship to me anywhere in the U.S. when I need a replacement. Alternative sources for contact lens outside of my personal optometrist are a life saver. This is very important to me and I implore you to consider the citizens who deserve the right to have a choice before you pass into law harmful and hindering legislation which could complicate and reduce the quality of life for so many Americans like me. Thank you.
