Subject: Proposed rule to make me wait days for contact lenses

To whom it may concern:

I feel that I have the right as a contact lens consumer. to receive my Rx from my eye doctor and to buy contacts from other sources immediately. There should be NO requirement to wait for lenses. If I tear or lose a lense and need to wait for days for lenses to ship, I will not be able to see for up to a weeks time with the proposed regulation. This is completely ridiculous as I would not be able to perform my job, drive, or even care for my pets! I deserve the freedom to obtain my lenses quickly and easily.

Thank you for considering my feedback.
