I want to express my concern about making a law that would cause a delay in my being able to receive contact lenses in a timely, quick manner when I order them from alternative sources. I have often e-mailed or called and gotten immediate shipment of my contacts which has been so necessary for me to continue my work appropriately. This should easily be a "right" and not interfered with by a law to wait...no sense in making a person have to wait to get what they pay for and need. Thank you.
