Subject: We shouldn't have to wait for our contacts

I'm writing as a concerned consumer and contact lens wearer. I should not have to wait for days when I need contact lenses. What if I'm about to go on a long trip and didn't realize I was running low? What if I lost my contact lenses? I am a performer living in and there are times when I have to wear contact lenses for either auditions or when working. I cannot rely on my glasses as a backup. Please do not pass this ridiculous ruling.
