Subject: Contact Lens Law

This email is in regarding to the new Contact Lens law that consumers can now get their prescriptions and go purchase their lens elsewhere.

Personally, I have had to purchase my lens from the doctor who prescribed my lens. I could never get my prescription and I was forced to purchase my lens at a higher cost. I have seem many other sources offering lens at a lesser price, but have never been able to utilize them.

The new law is fair and I am very happy with it. This will keep contact lens cost competitive and affordable to consumers.
