**Subject:** contact lens rule

The advantages of quick contact lens replacement:

1. Worker productivity- If you need to see to do your job, do you call in sick for the several day waiting period?

2. Students- Students are more successful when they can see the teacher and presentations. Do they have to be handicapped for this waiting period?

3. Safer drivers- I have torn a contact lens and had the replacement shipped overnight. People should have glasses for a back up, but sometimes they do not and would have to drive anyway. Should innocent drivers be at risk while contact lens wearers are waiting the days for their replacements.

4. Personal freedom and choice- I do not always have my lenses shipped overnight, but I enjoy the freedom to choose this option.

I hope to continue to have the same freedom of choice: to buy my contact lens where I choose, and to receive them as quickly as possible. I, like most people I know, have a very busy life and need the freedom to find the fastest options.

Thank you,  
Valerie Kent
